Summary

Five years in B2B and B2C product design. Started as Proctorio's first design intern, built its first design system, and came back as Staff to own the multi-brand system behind a platform used by 8 million test takers. Now a React and Next.js design engineer.

Experience

Tori Bryan Design Services · Phoenix, AZ (Remote)

Design Engineer

Aug 2026 - Present

- Design and build production front ends for SLV Technologies clients in Next.js, React, Tailwind CSS, and Storybook, merged through GitHub review.
- Built fibo, an open-source design system on shadcn/ui and Base UI that installs as a shadcn registry.

Product Designer (Contract)

Feb 2023 - Jul 2026

- Designed 12+ documented Proctorio design system components, the Review Center video player, and its help center.
- For SLV Technologies clients, defined the design system for Modern Care Homes' senior living marketplace and built one themed system for Iron Diamond Media's 7 publications.

Proctorio · Scottsdale, AZ

Staff Product Designer

Sep 2025 - Aug 2026

- Owned the multi-brand design system and its governance while leading design across 3 products and 8 surfaces.
- Led the legacy system overhaul with 2 engineers: a 37-component MVP in 60 days on rebuilt semantic tokens that cut card variants from 587 to 32 and button variants from 1,160 to 480, and took buttons from roughly 40% failing WCAG to 100% AAA.
- Aligned the Figma library to the codebase 1:1 so an LLM could read it, then wrote the team's Claude Code skill framework and hooks that carry prototype changes into specs and release notes. Specs that took 3 days to 2 weeks now take under 30 minutes, returning about 80 hours per cycle, and the whole team adopted it.
- Took AuthorProof, an AI authorship-verification tool, from brief to production-ready MVP in 4 to 6 weeks. An architecture audit found 4 constraints that broke its core promise, and the smaller flow pitched in its place cut the wait before a quiz from about 10 minutes to seconds.
- Designed dense operational screens for Proctor Coverage Analytics and the Support Agent Dashboard, brought usability testing back into the process, and mentored junior designers and interns.

Product Designer

Jun 2025 - Sep 2025

- Rejoined full time after 2 years of contract work, shipped 2 product surfaces, and wrote the 60-day proposal that became the design system overhaul. Promoted to Staff after 90 days.

Multimedia Designer

2022 - Aug 2023

Multimedia Design Intern

Jun 2021 - 2022

- Joined as the first full-time design intern, then led the full rebrand: logo, color, visual language, and asset library.
- Built Proctorio's first design system, then moved from marketing into product UI.

Skills

Design: Design systems, token architecture, multi-brand theming, data-dense interfaces, prototyping, usability testing, WCAG

Engineering: React, Next.js, JavaScript, Tailwind CSS, shadcn/ui, Base UI, Astro, Storybook, HTML, CSS, GitHub

Tools: Figma, Claude Code, Cursor, MCP, Code Connect, Framer, Adobe Creative Suite, Notion

Education

Arizona State University, B.A. Digital Communication and Media/Multimedia, Tempe, AZ

Dec 2023

Certifications: IRB Social and Behavioral Research (CITI Program), Search Engine Optimization (Stukent)
